Exam BI0-112: Cognos 8 BI Author v2

Question: 1

In Report Studio, an author creates a list report containing columns for Staff Name, Order number, and Revenue. The author wants to burst this report to various sales staff members. Each member should see only data relating to sales they have made. What must the author do to specify that the burst report output will contain only data for the appropriate sales staff member?

- A. In the report layout, create a master-detail relationship on the Staff Name data item.
- B. In the report layout, add the Staff Name data item as a property of the List object.
- C. In the burst options for the report, use the Staff Name data item to specify the Burst Recipients.
- D. In the burst options for the report, use the Staff Name data item to specify the Burst Groups.

Answer: D

Question: 2

An author creates a report for bursting. In Report Studio, the author sets the burst type for the report to Directory entries. In Cognos Connection, the author sets the run options to burst the report and send the report by email. If the email addresses for the burst recipients are accessible by Cognos 8, what is the expected result?

- A. The report is burst to email addresses only.
- B. The report is burst to both email addresses and directory entries.
- C. The report is burst to directory entries only.
- D. A warning message appears indicating a conflict in the run options.

Answer: B

Question: 3

Which statement is true about using a burst key to burst reports?

- A. A burst key can be added to a crosstab report.
- B. A burst key can be added to a list report.
- C. A burst key can be added to a chart report.
- D. A burst key can be added to a map report.

Answer: B

Question: 4
